

The sterilization company

Newseal 05

Committed to quality and innovation

Newseal

The professional sealer

The NEWSEAL system enables surgical instruments and handpieces to be wrapped before being put in the autoclave so as to maintain sterility after sterilisation has been completed.

The new sealing system uses a self-regulating heating element which produces a 10 - 11 mm seal with no risk of accidentally burning the paper.

The technology employed by the NEWSEAL system ensures great reliability and easy and safe use even by any member of staff.

The state of the art materials and strict quality control in production and testing provide high performance and the utmost reliability.

- Automatic 10 - 11 mm seal
- Self-regulating heating element
- Scorch protection

NEWSEAL ...the professional choice
