

## Sterilization Packs

### Flat

- Transparent, multilayer co-polymer film allows easy identification.
- Reinforced film to avoid tear during opening.
- Superior barrier with 60 gm or 70 gm medical kraft paper.

### Pouches

- Medical kraft paper & multilayer transparent co-polymer.
- Just like sterilization reel, fiber free opening.
- Water based, non toxic process indicators for steam & EO gas are imprinted.

### Self Seal

- Do not require sealing machines.
- Excellent adhesive resistant to over-exposure of steam.
- Closing flap is perforated for easy determination of the folding area.

### Wrapping Sheets

- Controlled porosity.
- Bacterial barrier.
- Made from virgin wood pulp.

### Tyvek

- Outstanding strength, durability, and tear resistance.
- For EO & Gamma sterilization, Tyvek® is also for plasma sterilizers.

### Gusseted

- Non-toxic accurate, process indicators for steam & EO gas conforming to the EN 867-2.
- Strong seal-strength, visible sealing lines.
- Conformity with EN 868-5.
